About Anallergo

Anallergo is a biotech company dedicated to producing high-quality allergen management solutions. Founded with a mission to improve lives through innovative allergen management products, Anallergo adheres to strict regulatory standards to ensure the safety and efficacy of its products. The company has a rich history of commitment to research, development, and customer satisfaction.

The Challenge

As Anallergo expanded, they realized their existing systems were inadequate for managing complex quality processes like change control and document handling. These limitations prompted the search for a more robust Quality Management System (QMS) to maintain their high standards and support their growth.

The Solution

Anallergo selected Scilife for its comprehensive eQMS capabilities, which aligned perfectly with their needs. The implementation process was meticulously planned and executed, with extensive support from the Scilife team. Anallergo implemented key modules such as Document Management, Change Control Management, and Training, which were critical for their operations.

The team at Anallergo made time each week to master Scilife and utilize the platform's comprehensive training resources. Scilife's clear guidance ensured a seamless data import process, allowing for a smooth transition to the new system.

TRAINING

"We realized that to keep up with our quality standards, we needed a more robust solution than our current system. The limitations of our current setup made it clear that we needed a centralized, efficient system for managing change control and documents."

Alessandro Ballini,
*Executive Manufacturing
Advisor at Anallergo*

Alessandro Ballini,
Executive Manufacturing
Advisor at Anallergo

"The implementation was very methodical, and the support from Scilife made it a smooth process. The training videos were incredibly helpful in getting our team up to speed quickly. We dedicated a significant amount of time each week to ensure we were fully prepared to use Scilife effectively."

The Results

"Thanks to Scilife, we've noticed significant improvements in our quality system within a short period. The move to a digital platform has enhanced our communication, making it easier to collaborate and make decisions quickly."

Alessandro Ballini,
Executive Manufacturing
Advisor at Anallergo

Efficient Document Management

Anallergo now easily manages critical documents such as SOPs and CAPAs using Scilife's centralized platform. This has drastically reduced the time spent locating documents and streamlining workflows.

Enhanced Compliance

Scilife's audit trail feature provides full traceability of document changes and approvals, helping Anallergo stay compliant with industry regulations. The system's document validation capabilities ensure that Anallergo is always prepared for external audits.

Improved Collaboration

Scilife has improved communication across departments by providing centralized access to all quality-related information. This real-time data sharing has reduced errors and increased overall efficiency, making it easier for teams to collaborate effectively.

Reach Smart Quality with Scilife

Ready to bring new clarity to your Quality Management?

We're here, ready to help you turn quality into your brightest asset. Join esteemed leaders in the life sciences industry, such as Novartis, Biocartis, Yusen Logistics, Polpharma, Pendulum, and many more who trust Scilife to automate their processes, empower employees to take ownership of quality, enhance efficiency and transparency, and reduce compliance risk. The impact? Focus on what truly matters—creating transformative, life-saving solutions.

We'd love to hear from you!
