About QuaDigi

QuaDigi is a partner-owned Lithuanian company that provides essential software engineering solutions in the medical and safety industries. As a go-to service provider for medical product development, QuaDigi travels within Europe and the US to meet with its partners and share knowledge on product development.

Uses Scilife for

DOCUMENT MANAGEMENT

CHANGE CONTROL
MANAGEMENT

TRAINING

SUPPLIER MANAGEMENT

The Challenge

As a new but rapidly growing company, QuaDigi sought an eQMS that could scale with them. While Document Control was their primary concern, they also needed a solution that would support their long-term goals of achieving ISO 9001 and ISO 13485 certifications by 2025. This meant finding a system that not only managed documents effectively but also helped ensure compliance with quality and regulatory standards critical to their industry.

The Solution

QuaDigi first implemented Scilife's Document Control module, followed by Change Control Management. The onboarding process was smooth, and Scilife's support system provided quick responses whenever needed, allowing the team to efficiently manage document access and organization.

With Scilife, QuaDigi ensures that documents are accessible to the right people, preventing misplacement or unauthorized access. The Change Control Management module streamlined the approval process by automating signatures and making tasks clear, saving time and reducing the need for manual follow-ups. The team found the system both thorough and user-friendly.

“I chose Scilife because everything looked good and easy to use. I liked the modules and the structure of it, along with the main logic and ideas. The onboarding process was smooth. And now, if I need something, I just use the ticket system and get a response quickly.”

Indra Raudonė, QA Manager

Indra Raudonė, QA Manager

“For me, it would be difficult running around with paper documents, asking for signatures. I just love that I do not have this hassle. Why deal with that when you can sit comfortably with a beautiful view from your home office and read your documents digitally?”

The Results

“We now know who needs to do what, and when. This saves time without needing to go around and ask others to sign the documents. Everything is there, so you don't have to go crazy searching for things.”

Indra Raudonė, QA Manager

Efficient Document Control and Change Management

QuaDigi implemented Scilife's Document Control and Change Control Management modules, enabling streamlined document handling. The system ensures that the right team members access the relevant documents, preventing documents from getting lost or falling into the wrong hands. It has also simplified the process of gathering signatures and ensuring document approval, reducing time spent chasing approvals.

Time-saving automation of processes

With Scilife, QuaDigi has automated tasks like document approval, which saves the team from manually tracking down signatures. The team can now manage documents without having to search for them manually. This has reduced inefficiencies and helped the team focus on their core tasks rather than administrative work.

Future-ready with certifications in sight

Although QuaDigi hasn't yet achieved ISO 9001 and ISO 13485 certifications, Scilife is putting them on track to attain these by 2025. The eQMS is already providing the structure they need to meet these compliance goals, while also offering additional modules like Training and Supplier Management that can support broader quality management needs as the company grows.

Reach Smart Quality with Scilife

Ready to bring new clarity to your Quality Management?

We're here, ready to help you turn quality into your brightest asset. Join esteemed leaders in the life sciences industry, such as Novartis, Biocartis, Yusen Logistics, Polpharma, Pendulum, and many more who trust Scilife to automate their processes, empower employees to take ownership of quality, enhance efficiency and transparency, and reduce compliance risk. The impact? Focus on what truly matters—creating transformative, life-saving solutions.

We'd love to hear from you!
